

Institutional Review Board Minutes

April 2, 2003

Members Present: Finney, Preiss, Swinth, Woodward

Absent: Kay, Wells, Cohen, Coogan, Ferrari

Meeting was called to order at 9:05. The committee discussed general issues regarding the way in which the IRB provided follow-up. Of particular concern was a recent case at the University of Washington where a researcher's activities deviated substantially from what was proposed in the original IRB protocol. The extent to which our IRB follows-up on research activities is generally restricted to the end of the year research report.

0203-007 The research was approved as written.

0201-018 The modifications were clearly articulated, and it was approved as modified.

Meeting adjourned at 9:35.
