

Puget Sound COVID-19 Pooled Testing Protocols Accessing Your Test Results

Each day's testing pools will be shipped to the lab overnight and processed by the lab the next day. Results will be available within 24–48 hours of the lab receiving your sample. Samples collected or dropped off after 3 p.m. will be shipped to the lab the following business day.

Access Your Results:

- Go to **pugetsound.edu/testresults**.
- Log in using your **campus ID number**, located on your LoggerCard. Enter the full 10-digit ID number, including preceding zeros.

What Your Results Mean:

- **Not Detected:** Your pool has cleared, and you may continue your campus activities.
- **Processing:** Testing of your pool is not yet complete.

If your pool is not cleared, you may be part of a pool in which someone has tested positive for COVID-19. You will be contacted by text and email, and you must **stay home and limit contact with others** until you receive further instructions from a member of Counseling, Health, and Wellness Services.

For more information about spring COVID-19 testing protocols and accessing your test results, visit pugetsound.edu/covid19testing.
