**NOTES:**

**Puget Sound requires a total of 32 units to graduate.**

- 1) Chemistry should be taken in the first year. First-year Chemistry requirements: CHEM 110 and 120 or CHEM 115 and 230.
- 2) Math may be delayed for a year or two. Math 260 is STRONGLY ENCOURAGED AND may substitute for MATH 181.
- 3) Two additional units in Biology are required, one of which must be at the 300 or 400 level (excluding BIOL 398) and which can include one research credit (BIOL 390, 490, or 491). Students with an interest in evolutionary, environmental, or ecological applications should strongly consider BIOL 112 or 360 as their electives. BIOL 112 may be taken during the freshman year and is strongly encouraged. Students may not use BIOL 361 to satisfy this requirement.
- 4) Students who satisfy the first-year Chemistry requirement with CHEM 110 and 120 must also complete CHEM 231 prior to enrolling in CHEM 460.
- 5) Of the three units of upper division coursework required outside the first major, the Connections course will count for one unless it is used to meet a major requirement.

#### NOTES

\*These major requirements may be used to fulfill the Natural Scientific Approaches core.

\*\*Two additional units in Biology are required, one of which must be at the 300 or 400 level (excluding BIOL 398) and which can include one research unit (BIOL 390, 490, or 491). One of these electives must be completed on the Puget sound campus. Students with an interest in evolutionary, environmental, or ecological applications molecular biology should strongly consider BIOL 112 and 360 as their electives. BIOL 112 may be taken during the freshman year and is strongly encouraged. Students may not use BIOL 361 to satisfy this requirement.

\*\*\*Students who satisfy the first-year Chemistry requirement with CHEM 110 and 120 must also complete CHEM 231 prior to enrolling in CHEM 460.

\*\*\*\*These major requirements may be used to fill the Mathematical Approaches core.

**The following courses do not satisfy major or minor requirements: BIOL 101, 201, 205, 398, 498, or 499; INTN 497.**

#PHYS 111/112 or PHYS 121/122; MATH 150+; CSCI 141+.

Molecular and Cell Biology majors are encouraged to participate in the undergraduate research program, provided they consult with and gain approval from a biology faculty research advisor and submit a research proposal. Related courses include 290/390/490 (Directed research), and 491 (Senior Thesis). Students planning a senior thesis should enroll in BIOL 201 (Biology Colloquium), BIOL 392 (Introduction to Biological research) and either one unit of BIOL 491 or BIOL 490 and 491. One research unit or independent study (390, 490, and 491) may count as an advanced elective for the major.
