vDesk (Virtual Desktop) Information
## VMware Full Client Installation Instructions for Mac O/S

1. From any web browser, navigate to https://vdesk.pugetsound.edu and click on the install VMware Horizon Client link to begin the install.

2. Click on the *Go to Downloads* to download the current VMware Mac client version 4.8.0.

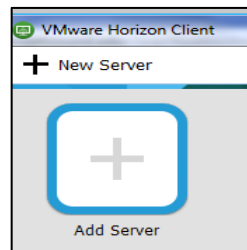

3. Run the VMware-Horizon-Client 4.6.0-6607320.dmg file. You may have to save the file first, and then **Run** the file.

4. Follow the setup instructions.

5. Drag the download into the Applications folder, and wait for the files to copy over to the Applications folder.

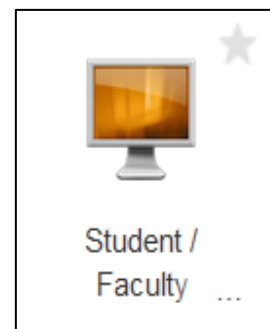

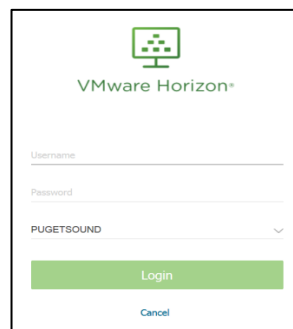

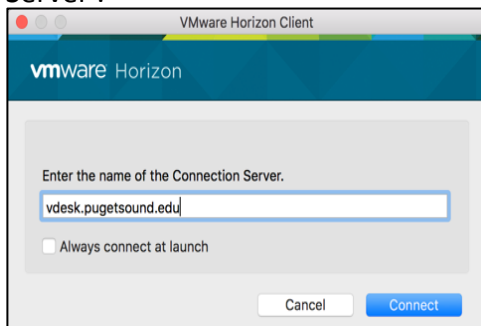

6. Find the VMware Horizon Client icon in your applications folder and click to open. Click "+" to add a New Server.

7. Enter the name of the Connection Server .

8. Log into vdesk using your Puget Sound credentials, and click on the Student/Faculty icon.

10. Windows will create your profile which will take a few moments. Wait for Welcome screens to finish.

11. Start using vDesk! Your Desktop will appear as Windows 10 for both Windows and Mac O/S.
